Study of different (types of network cables and crimping of cable. RJ45 connector)

- Aim:

To study the different types of network cables and crimp and ethernet cable using an RJ45 connectors. types of network cables:

1) Twisted pair cables.
   → UTP (unshielded twisted pair).
   → STP (shielded twisted pair)
2) Coaxial - cable 3) optical fibre cable RJ45 n

colour code - T568B (Default order).

pin	colour.
1	white orange.
2	orange
3	white-green
4.	blue

pin	colour.
5	white-blue.
6	green.
7	white brown.
8.	brown

Order:

white orang → orange → white green → Blue → Green → Whit
→ Brown. → Brown.

Input:

1. cat 5e/cat 6 ethernet cable
2. RJ45 cable. connector.
3. cable tester.

~~WO - O - WG - B - WB - G.~~

Colour Sequence Input:

WO - O - WG - B - WB - G - WBR - Br.

Output:

The network cable was successfully crimped with an RJ45 connector using the IEC 68B colour standard, and the cable connection was verified using a cable tester.
